Species Records for Bucks and Milton Keynes Environmental Records Centre (BMERC)

Please provide as much detail about each species you saw and where you saw it. If you don't know the grid reference a postocde will do. Additional information, such as sex, whether breeding, in flower etc. is also helpful. At a minimum we will need: What (species - common and/or scientific name), Where (location), When (date) and Who

(recorder). The grey fields are mandatory the white ones optional.
